

REMARKS

An inconsistency between the drawings and the specification has been identified. There is a drawing labeled Figure 2a. However, formerly Paragraph 6 (in the Brief Description of Drawings) referenced a Figure 2, and did not reference Figure 2a, as was intended. Therefore the Specification has been amended (as shown above) to correct this discrepancy. As such the drawings and specification are believed to be consistent, addressing and rendering moot the issue raised in the Notice of Drawing Inconsistency with Specification. The application is therefore believed to be in a condition of allowance.

It is respectfully urged that the drawings and specification of the subject application are consistent, and that the application is in condition for allowance.

Respectfully submitted,
